CAMECONNECT
CLOUD CONNECTED TECHNOLOGY

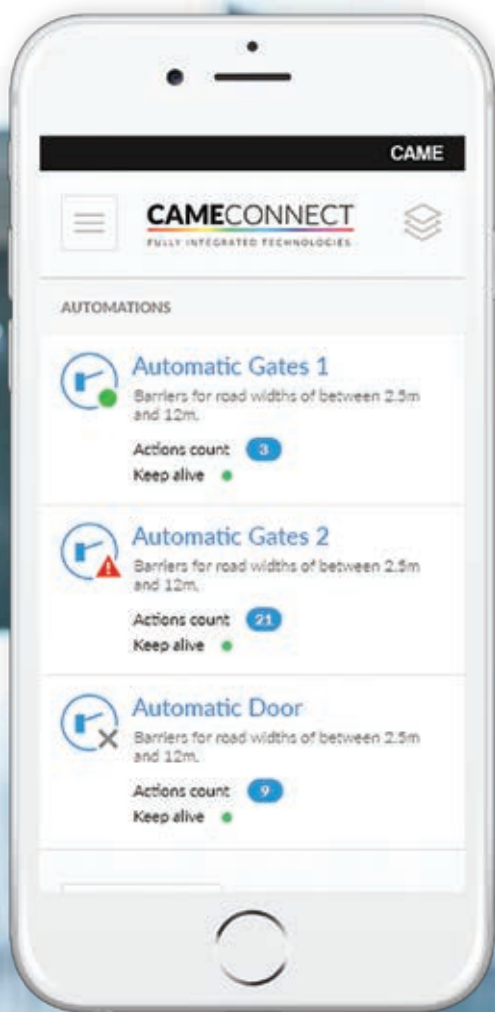

CAMECONNECT
CLOUD CONNECTED TECHNOLOGY

Came Connect is the technology for remotely controlling all of the operators fitted to your system. Thanks to the Internet, users and installers can now efficiently manage, 24/7, all of the automation and safety systems from any mobile device like a smartphone, tablet or PC.

ALL YOUR WORLD CONNECTED

A CORE COMFORT OPERATOR

Manage your daily habits at home, and the access points or security in large public areas with our innovative and reliable technological solutions. Came Connect is secure and simple for users and operations staff. Its Cloud connection lets you remotely control all operators fitted on your system from any Internet connected device. Came's use of this technology has forever changed the way we experience our private living space, by enhancing its quality.

MULTIPLE BENEFITS ONE PLATFORM

Came enters a new era by integrating Cloud technology with its products.

Gate operators, automatic doors, barriers, turnstiles, automatic pay-to-park systems, home and building automation systems, thermostat control, video entry system, video surveillance: all you need, for homes or large public venues today, is online.

CUTTING-EDGE INNOVATION

With Came Connect and Came's wide range of product's, users and installers can now revolutionize, upgrade, secure and rationalize their projects. All thanks to this advanced technology that is ideal for managing modern homes and large public venues.

REMOTE EFFICIENCY

Cloud technology lets you easily manage all function, control and diagnostic configurations on your system, at any time, just by going online via smartphone or tablet.

EASY TO MANAGE

Came Connect technology lets you manage systems from a single user-friendly web platform. It lets installers configure and intervene on all devices more efficiently, as the settings are all uniform.

Came Connect is a revolution for both users and installers. They can now interact with all of the systems in place via a single platform; reachable from any Internet-linked device.

OPTIMAL CONTROL

The Came Connect device management platform shows you a full picture of all of the device's statuses. They are now much simpler to monitor.

ONGOING ASSISTANCE

Came Connect greatly improves system assistance standards. The web platform alerts end users of any malfunctions or maintenance issues, so they can then request action from either installers or Came support.

EXHAUSTIVE RANGE

By integrating Came Connect to all Came products, installers and end users can enjoy all the benefits of Cloud technology applied to a complete range of products, one that meets all automation needs both in homes and large public venues.

CAMECONNECT
CLOUD CONNECTED TECHNOLOGY

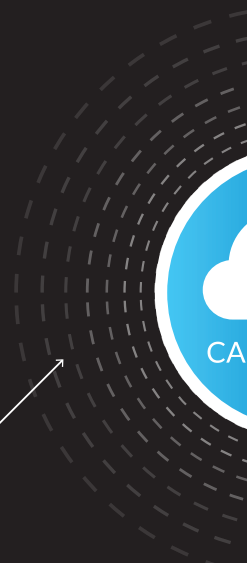

A SINGLE SYSTEM REALLY LINKS UP THINGS WITH PEOPLE

Came's Cloud service really lets you exploit the multitude of functions on the device installed in your system. You can now also remotely intervene simply by secure and highly reliable connection.

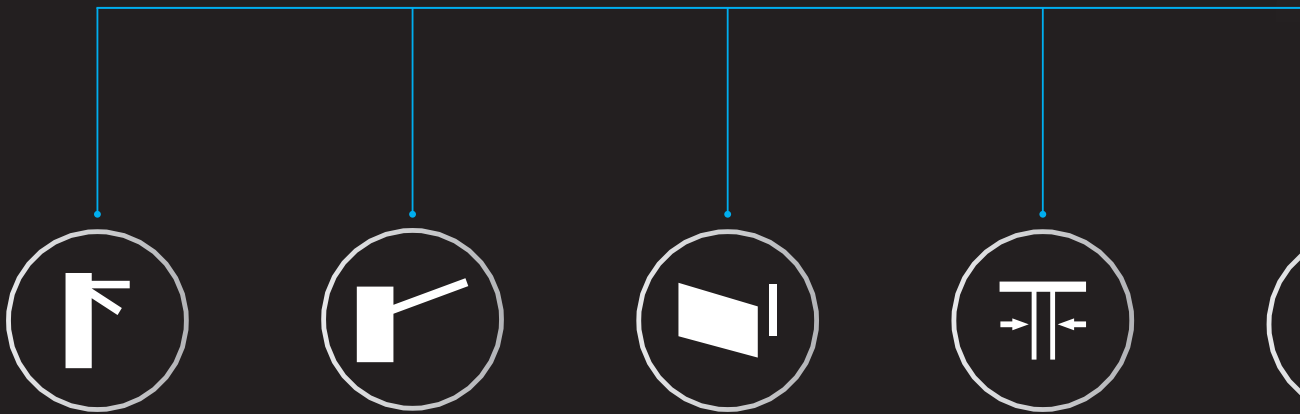

Came Connect's innovative technology ensures that your Came system links up to the Cloud, from which you can manage every device you have installed.

HOME

Integrated into every gate, door, garage and shutter operator, Came Connect brings every one the benefits of remote management via Cloud.

OPERATORS FOR HOMES

The screenshot displays the CAMECONNECT web interface for managing Automatic Gates. The interface is divided into a sidebar and a main content area. The sidebar on the left contains navigation options: Home, Automations list (highlighted), Automations map, Scenarios, Schedules, Alerts (with a count of 3), Notifications (with a count of 9), Statistics, Users, and Administration. The main content area shows the 'Automatic Gates' section for 'Barrier 1 - Red'. It includes a status indicator 'STATUS: OPENED' with a warning message 'WARNING: AUTOMATION PROBLEMS WERE DETECTED'. Below this, there are two sections of commands: 'COMMANDS' with buttons for 'Open', 'Close', 'Open / Close', and 'Sequential'; and 'ADVANCED COMMANDS' with buttons for 'Reset software', 'Stop', and 'Factory reset'. At the bottom of the main content area, there are buttons for 'Back to list' and 'Automation Configuration'. The footer contains copyright information 'Copyright © 2015 CAME - All rights reserved - P.IVA 03481280265' and language settings 'Language: English' and 'Fullscreen'.

Thanks to Cloud technology, today you can manage home operators from any Internet-linked device. It gives you a vast number of function, monitoring and control configurations.

USER BENEFITS:

- Remotely managing operators via smartphone, tablet or PC
- Can command opening and closing of operators
- Can change functioning settings
- Receiving feedback on status of operators

INSTALLER BENEFITS:

- Remote configuration (tele-assistance)
- Filing all of the systems
- Receiving maintenance warnings

HOME & BUILDING AUTOMATION

Came Connect is the core of AMA, the new Came home automation system for intelligent management of familiar, habitual, daily motions. With Cloud technology, we now manage home automation devices at any time, even from a smartphone or tablet. You can create a historical log of the system, control the status of all rooms in the home, the video camera images and launch scenarios, manage various utilities to interact with your home when you are away.

INSTALLER BENEFITS:

- Configuring remotely (tele-assistance)
- Filing all of the systems
- Receiving maintenance warnings

USER BENEFITS:

- Remotely managing home automation devices via smartphone, tablet or PC; as user-friendly as it gets!

SECURITY

USER BENEFITS:

- Remotely managing safety devices via smartphone, tablet or PC; as user-friendly and intuitive as from a touchscreen at home
- Viewing images and videos of alarm events (video-checking)

THERMOSTAT CONTROL

USER BENEFITS:

The integrated thermostat control in a home automation system is for remotely managing the home's control functions. Even a simple thermostat control system or several systems installed in one building can be managed individually from any Internet-connected device.

VIDEO ENTRY SYSTEM AND CCTV

USER BENEFITS:

- Reply to video entry panel over smartphone, tablet or PC
- Manage video streams from video cameras with IP technology

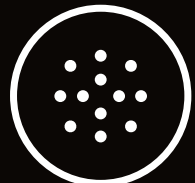

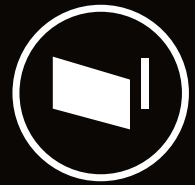

YOUR GLOBAL PROJECT PARTNER

Came Connect's remote management and complete range make Came the global partner for users and installers.

Came Connect: the access point to all devices.

With Came Connect, the wide range of Came products – single video receivers, full home automation systems, automatic parking, integrated large access-control and public venue solutions – has evolved. This means linked up operators interacting with users and installers via any Internet-linked device, at any time. Came Connect makes Came an ideal partner for installers: just one party to deal with to meet all of your automation needs and provide state-of-the-art configuring services for managing entire systems over Cloud technology and, ensure greater efficiency in technical assistance to benefit end users.

CAME CONNECT, TECHNOLOGY BORN FOR EXPO MILANO 2015 DIGITAL SMART CITY. NOW AVAILABLE TO ALL, FOR AN ALL AROUND IMPROVEMENT IN MANAGING SECURITY AND COMFORT AT LARGE PUBLIC VENUES

AUTOMATIC PAY-TO-PARK SYSTEMS

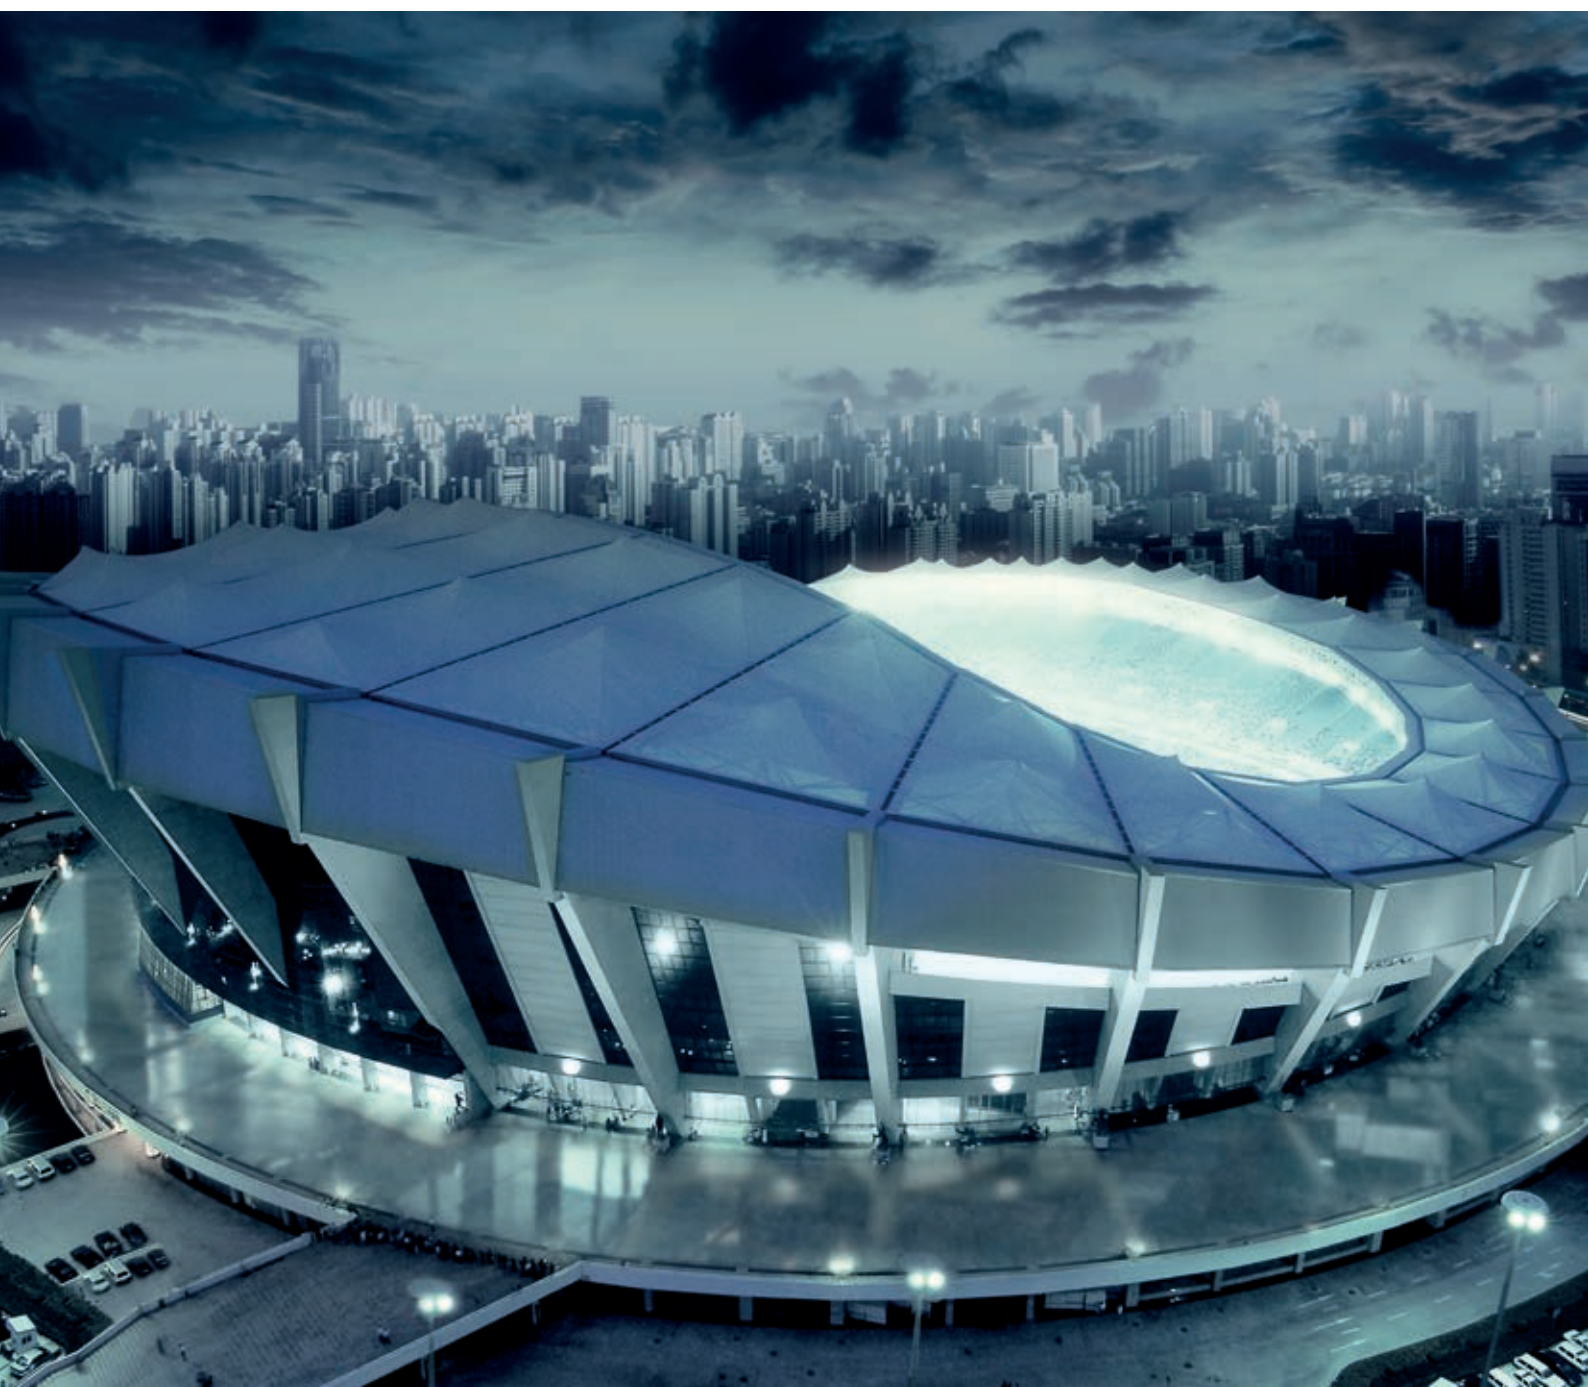

Came Connect now provides greater versatility in terms of services and functions to large automation and security systems, like automatic parking facilities and access control systems. Installers, security managers, system managers and tele-assistance managers: with Came Connect they finally have a dedicated management profile to simplify intervening on the system as concerns their specific responsibilities.

SPECIAL PROJECTS

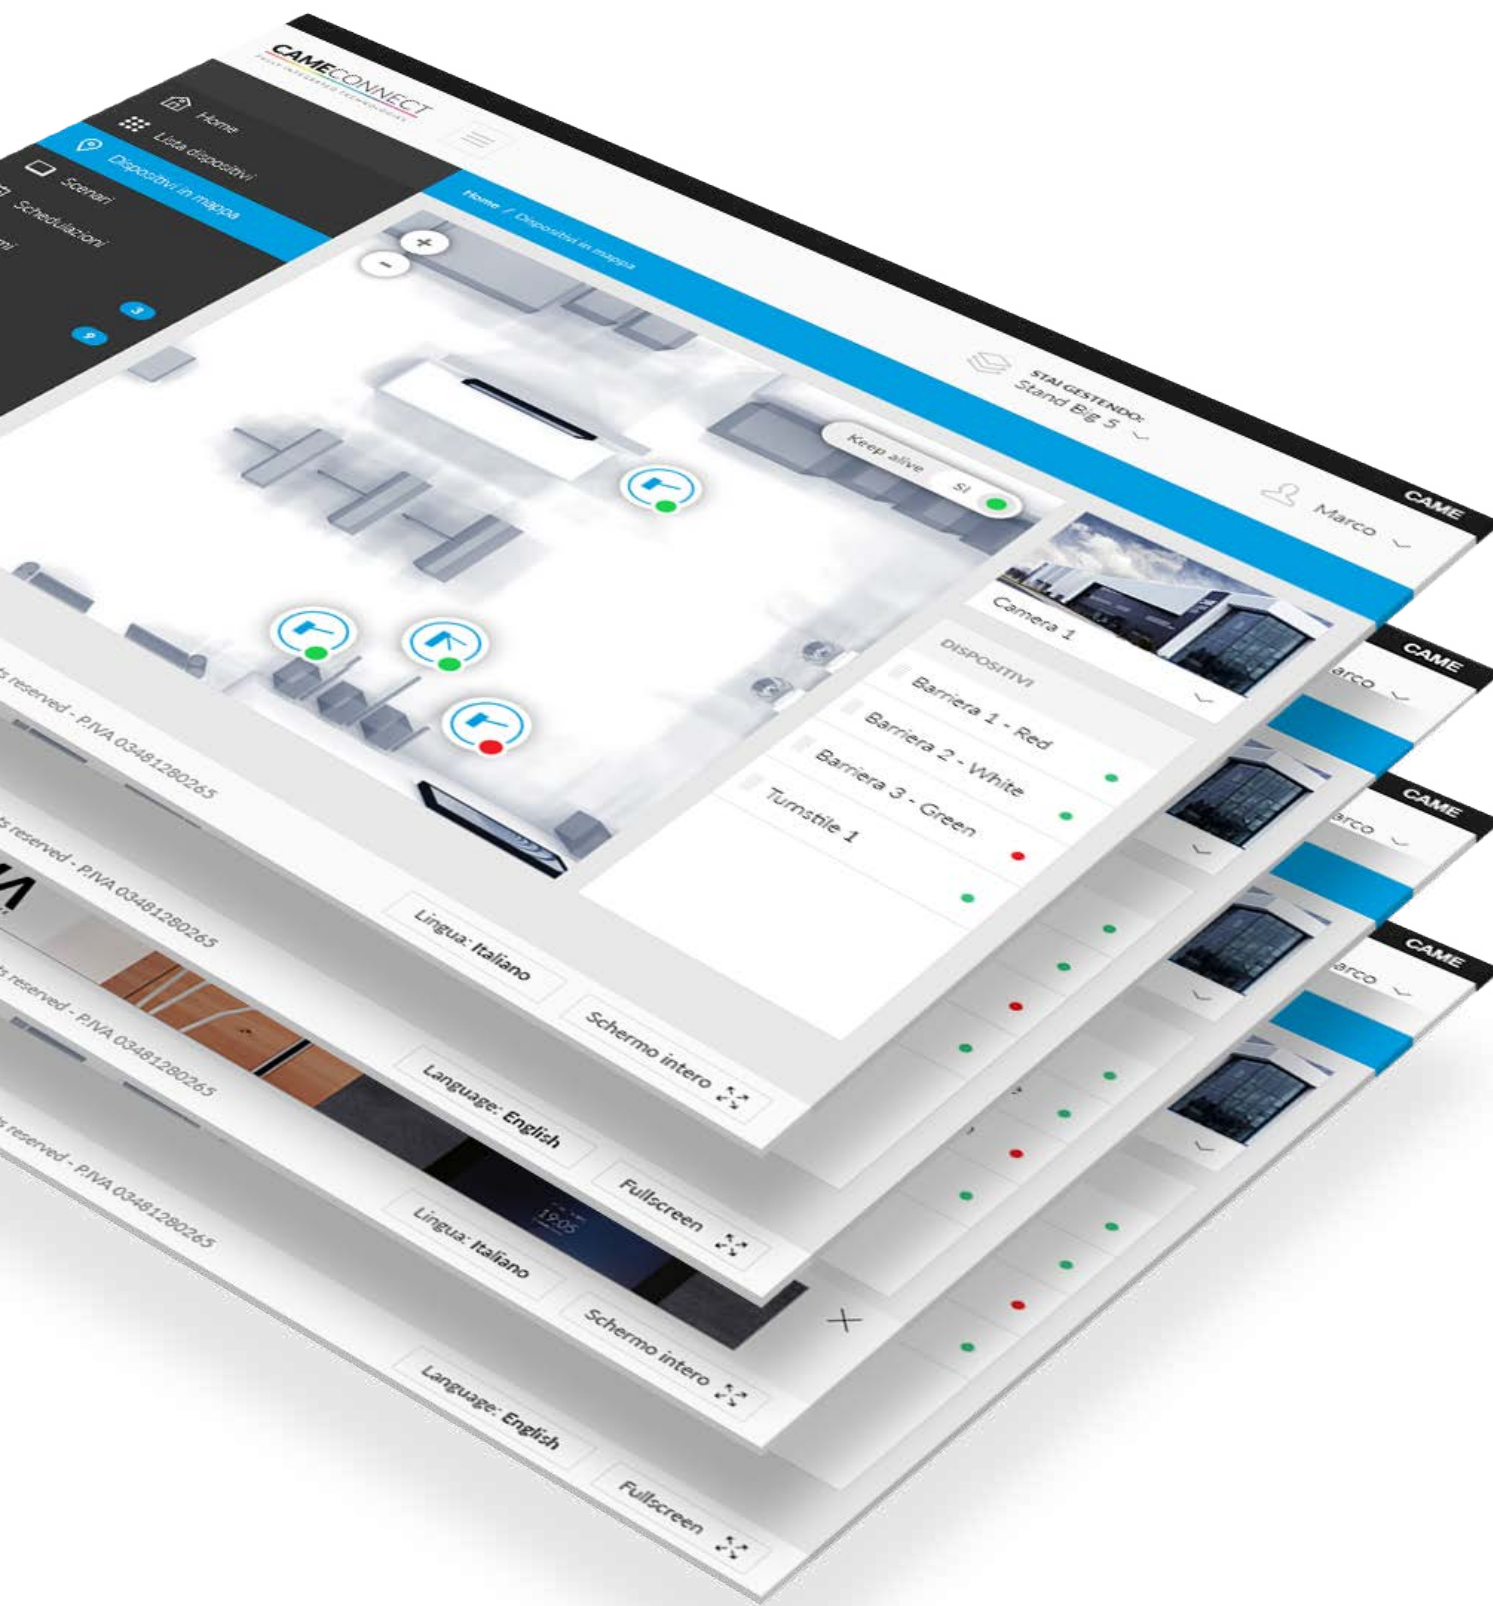

Developed for the Digital Smart City project of Expo Milano 2015, Came Connect is the Cloud technology now available for all special projects. With Came Connect, managing mobility, urban planning, big multi-functional structures that require high security levels, all becomes more efficient and secure.

Gates, barriers, bollards, turnstiles, automatic doors, burglar alarms, video surveillance systems, thermostat controls and video entry units are finally all online. That means you can remotely manage them at any time. Thanks to Cloud technology, managing complex private and public urban planning and building projects, has truly entered a new era.

CAME CONNECT CLOUD SERVICES CLICK TO MANAGE

Thanks to Cloud technology, today installers can manage all of the installed devices from one web portal which gives users efficient configuration, control and command and tele-assistance services.

The screenshot displays the CAMECONNECT web interface. At the top left, the logo 'CAMECONNECT FULLY INTEGRATED TECHNOLOGIES' is visible. The top right shows 'MANAGING: Stand Big 5' and a user profile 'Marco'. A navigation menu on the left lists: Home, Automations list, Automations map, Scenarios, Schedules, Alerts (3), Notifications (9), Statistics, Users, and Administration. The main area features a map of Treviso with several blue circular icons representing installed sites. A right sidebar contains a 'MAP BACKGROUND' section with 'Type: Google Maps' and a search bar containing 'Treviso'. Below this is a 'SITES' list with entries: Default site, Expo 2015, Sites 3, Sites 4, Sites 5, Sites 6, and Sites 7. At the bottom, there is a 'Language: English' dropdown and a 'Fullscreen' button. Copyright information at the bottom reads: 'Copyright © 2015 CAME - All rights reserved - P.IVA 03481280265'.

USER PROFILING AND MANAGEMENT

A *user-friendly* interface makes for easy setting of the various user profiles and different clearance levels.

VIEWING THE SYSTEM

Besides viewing a map of all of the installed system, you can also get a synoptic view of the system and access each device's control board to control and manage configuration preferences.

NOTICES

Through the web portal, you can receive maintenance warnings or system intervention requests, which makes for a long-lasting relationship between installers and users.

GEOPOSITIONING

Being able to create a list of systems viewed on a graphic map and quickly searching for data, gives installers total control of the systems they have installed.

SCENARIOS

Thanks to Came Connect, launching scenarios is now also possible for very large systems. With the same simplicity used to manage home automation systems, you can now launch scenarios - for parking facilities, entire buildings and large public areas - customized to your specific needs.

STATISTICS

The web portal lets you monitor and analyze statistics about the system's use to optimize the way you manage it. You can track energy consumption, demand peaks and assess the frequency of maintenance jobs.
